It's People, Process and Technology - in That Order

Wednesday, 08 April 2009

Healthcare organisations are throwing mobile technology at problems without fully considering the underlying business processes or the working conditions of the end-user. This is the key finding of a multi-country report across the healthcare sector from industry analysts Quocirca. It was commissioned by Anoto, the inventor of Digital Pen and Paper technology.

ACS and Clinical Solutions Partner to Help Local Governments

Tuesday, 07 April 2009

Government organisations looking to better prepare for a public health outbreak will now have access to a complete pandemic management solution thanks to a new partnership between Affiliated Computer Services (NYSE: ACS) and Clinical Solutions. In the event of a pandemic outbreak, this fully managed solution would help local healthcare professionals, governments and citizens safely and consistently assess symptoms and direct patients to the most appropriate level of care - thereby alleviating strain on local primary care providers during a public health crisis.

Finnish Heart Research Technology VTT's Method Eases Early Diagnosis of Severe Heart Muscle Disease

Saturday, 04 April 2009

Dilated cardiomyopathy, a heart muscle disease leading to dilation and impaired contraction of the left ventricle, is a severe and often familial disease. It is difficult to diagnose the disease with cardiac ultrasound, particularly at an early stage when there are only minimal, early changes of the heart. VTT Technical Research Centre of Finland has developed a method based on cardiac MRI, currently in research use, to help the physician to identify disease-related changes of the heart at an early stage.

Call for proposals EIT-KICS-2009 - Knowledge and Innovation Communities

Friday, 03 April 2009

The ambition of the European Institute of Innovation and Technology (EIT) is to be a key driver of sustainable European growth and competitiveness through the stimulation of top class innovations with a positive impact on economy and society. As the first major step in developing the operations of the EIT, the priority is the selection by December 2009 of the first Knowledge and Innovation Communities (KICs).

Call for papers: eHealth and Beyond

Thursday, 02 April 2009

Today, citizens aged 65+ make up 16 percent of the total population in all EU countries; this is projected to rise to 18 percent by 2010 and will continue to rise. The most dramatic increase is expected in the 80+ age range with a corresponding increase in co-morbidities that will place additional strains on existing health systems.
