Current Product Features

- Automatic online PDF archive of every notebook
- Smart margin commands activate hand writing recognition when required and recognised text is automatically pushed back to the BlackBerry smartphone where it can be reviewed/edited
- Recognised notes can be sent as email, SMS or Fax or be used to create an Appointment, Task or Memo
- “Ink Search” – the ability to search your handwritten meeting notes on your BlackBerry smartphone and then display the handwritten pages on your device. Once these are displayed the user can elect to email them as a PDF or initiate handwriting recognition of the page(s).
- Over-the-air installation of the Digital Pen Application
- Automatic detection of BlackBerry Enterprise Server or BlackBerry Internet Service connection
- BlackBerry Digital Pen Application is translated into 6 languages; English, Italian, Spanish, German, French and Dutch
- Supports hand writing recognition in 7 languages; English, US English, Italian, Spanish, German, French and Dutch

- Supports Oxford Easybook M³ lined digital notebooks in A4, A5 and A6 sizes which is available in all major BlackBerry markets

Product Benefits

- **Secure archive of all your handwritten notes**
 - Essential backup when a notebook is mislaid
 - Important customer information is often kept in handwritten notebooks and the solution provides a business with access to these notes when important personnel leave
 - Staff notes quickly available for regulatory compliance
- **Fast access to your handwritten notes from anywhere.** Ability to search handwritten meeting notes on the BlackBerry enables users to quickly reference previous notes prior to or during a meeting. Meeting note pages returned in a search can be emailed as a PDF file or the user can elect to initiate handwriting recognition on them.
- **Faster turnaround of meeting notes.** Solution allows the immediate creation of a word document from handwritten notes.
- **Send emails, text messages and faxes via your BlackBerry using your handwriting.** PaperIQ's digital pen can undertake some of the most frequent tasks carried out on the BlackBerry. Create and send emails, text messages or faxes with just your handwriting. Recognised notes can be sent as email, SMS or Fax or be used to create an Appointment, Task or Memo.

Who Can Benefit From This Product?

- Any BlackBerry user who regularly takes meeting notes
- Any profession that needs to get their handwritten notes/drawings processed faster

Enterprise Version

- PaperIQ Enterprise Server provides an enterprise solution for notes. This enables clients to install the PaperIQ platform behind the company firewall and ensure that all meeting notes remain within their own data network
- .NET integration API allows corporate Smart Margin tags to be defined and linked to specific data integration tasks such as updating a CRM system or automatic archiving in a company document management system

Proposition Summary
