

"A Japanese credit finance company, Central Finance who has adopted the DNP's DP&P solution cooperates with Toshun Shinkin Bank in the Digital pen system"

When Toshun Shinkin bank handles personal loan applications, application forms had to be sent to Central Finance from the bank by fax for credit checks. By DNP's technical support, the existing Digital pen system in Central Finance has been improved to be utilized by banks.

Digital pens are placed in each branch of banks to have customers fill out the form, or sales representative may bring the digital pen when visiting customers. Handwritten data are immediately transferred to Central Finance's server, the system enables quick processing of loan applications without special training, without fax transmission error, without re-input data.
